

# RICO VIVIERS

**Aeronautical Engineer**

Pretoria, South Africa

065 305 6892

[ricoleonardv@gmail.com](mailto:ricoleonardv@gmail.com)

---

## **PROFESSIONAL SUMMARY**

Aspiring aeronautical engineer with hands-on experience in equipment maintenance, live-event troubleshooting, and team leadership. Blends CAD design and programming skills (Python, C++) with a sharp eye for quality and a calm head under pressure. Currently completing a GED while actively pursuing entry-level engineering roles—ready to bring mechanical intuition, analytical thinking, and a strong work ethic to design, testing, or manufacturing teams.

---

## **SKILLS**

CAD ( AutoCAD)

Project management

Mechanical aptitude

Team leadership

Quality control & inspection

Stakeholder coordination

Python & C++ programming

Troubleshooting under pressure

Technical documentation

Quick Learner

## **EMPLOYMENT HISTORY**

### **Sound director, VEK Sinoville Lighuis**

- Led a technical team of volunteers, managing schedules, training, and on-site coordination for weekly services and special events.
- Maintained and troubleshot complex audio and electronic systems, ensuring 100% reliability during services.
- Implemented preventative maintenance schedules and quality control checks, reducing equipment failure rates and improving overall system performances.
- Developed clear technical documentation and operating procedures for team members.

### **Signage and apparel technician, HD & A Designs**

- Operated and maintained a range of mechanical and electronic production equipment, including heat-presses, sublimation printers, wide-format printers, and vinyl cutters.
- Performed routine maintenance, calibration and minor repairs on machinery to minimize downtime and ensure consistent output quality.
- Executed precise quality control inspections on finished products, ensuring all items met client specifications.
- Managed multiple production orders simultaneously, coordinating with clients and team members to meet deadlines.
